

SAPHENEIA INSTALLS CLARITY™ CT AT DIAGNOSTIC HEALTH CORPORATION IMAGING CENTERS

Clarity™ CT Solution REDUCES EFFECTIVE DOSE BY UP TO 50%

December 21, 2010 – Sapheneia, a global imaging services company, today announced the installation of **Clarity CT** at seven (7) Diagnostic Health Corporation (“DHC”) imaging centers with additional implementation plans underway to complete the deployment of **Clarity CT** at over twenty (20) DHC imaging centers by January 2011. DHC joins a growing list of hospitals, imaging centers and clinics that use the **Clarity CT Solution** to enable material reductions in the medical radiation exposed to patients.

“DHC is committed to continuously enhancing the imaging services we provide to both our patients and the local communities we serve. Consistent with this commitment, we signed a master agreement with Sapheneia to implement their low dose CT solution at all our imaging centers. We are pleased to have completed phase one of the rollout with the successful installation of **Clarity CT** throughout our northeast region and look forward to completing the enterprise-wide implementation in the coming months,” commented Rob Gontarek, Chief Operation Officer, Diagnostic Healthcare Corporation.

“We are honored to be selected by Diagnostic Health as their low dose solution partner and to be recognized as a cost-effective solution for reducing medical imaging radiation exposed to patients. Once implemented, Diagnostic Health will have a unique opportunity to demonstrate to their local community a market-leading commitment to enhanced patient safety through the use of **Clarity CT**, which in turn provides Diagnostic Health with a competitive differentiator,” states Hans Grahn, Ph.D., CEO, Sapheneia.

About Sapheneia

Sapheneia is a global, ISO-certified imaging services company specializing in diagnostic and analytical image processing solutions. Sapheneia’s mission is to provide medical image optimization products to promote higher diagnostic confidence, greater patient and medical staff safety, and improved cost-effectiveness of medical imaging. Sapheneia’s **Clarity CT Solution** enhances the diagnostic quality of images based on settings optimized by the radiologist. This enables lower radiation dose exposures while simultaneously providing radiologists with the diagnostic confidence previously available only when reading the same images at full dose.
